Report on-
**Training on "Use of Interactive Digital Display
for Teaching-Learning Process"**

Today, the 25th of May, 2023 a training session on the Interactive Digital Display was organized for the faculty members by the IQAC of the college in New Hall at 12 pm. The main objective of the session was to train faculty members on the use of the Interactive Digital Display for classes. This was aimed at making teaching learning process more engaging and effective. An interactive digital display is a type of digital display that allows users to interact with it. Interactive displays are becoming increasingly popular due to their many benefits. They are more engaging and attention-grabbing than traditional static displays, and they can be used to create a more immersive and interactive digital signage experience. Interactive whiteboards are a useful tool for integrating learning styles. Dr. Bhupen Rabha, Assistant Coordinator of IQAC gave a demonstration on how to start the display and access the contents. He also showed how Movies, PowerPoint presentations can be displayed in addition to text-based lessons. The teachers could learn how to use the display for writing using a stylus.

The Interactive Display helps students to learn better and remember more as they can learn in a way that best fits for them, while experiencing a connection to their learning by hearing, seeing and interacting with the board through touch.

The training session was a great success as the participating teachers could learn how to use the Interactive Digital Display for a better teaching experience that would be benefitted by the students.

The session ended with a positive note that more such training sessions would be organized for the faculty members.
